

## Aertssen Kranen, your partner as a mobile crane rental company and heavy lift contractor.

As crane rental company, we can deliver any requested crane. As lifting contractor, we provide you with the most suitable solution. By combining our divisions “**earth moving**”, “**heavy transport**” and “**cranes**”, you can rely on an excellent execution of every job. Our company has a lot of experience with industrial and nuclear service contracting, building-, steel- and port based companies.

Aertssen Kranen’s **modern fleet** consists of:

- telescopic cranes (30 to 700 ton)
- crawler cranes (40 to 1250 ton)
- mobile tower cranes (easy to mount and easy to reposition, with excellent lifting capacities on long distance)

For the storage and assembly of equipment as well as loading and/or unloading of barges, we have a terminal concession in the port of Antwerp. This concession belongs to our subsidiary **Roll-It**, specialized in worldwide transport of exceptional and heavy project cargo by use of **private owned assets** (eg. SPMTs, barges,...).

All our jobs with qualified staff comply with the VCA-petrochemical- standard and ISO 9001 quality-control.
